How do I intall the FirstClass Client at home?

Installing the FirstClass Client at home will provide you with the same FirstClass user interface you use in your classroom, lab, or office. Users who would like to use their FirstClass accounts from home should install the FirstClass Client on their home computers.

Support for FirstClass Client home installations is limited because we have no control over those systems nor can we "see" your home computer.

It is highly recommended that you create a backup of your important data and/or create a restore point prior to installing any software, including the FirstClass Client.

1. open the [CommunityNet website](#) in an internet browser (Microsoft Internet Explorer, Mozilla Firefox, Safari, etc)

the CommunityNet website for DeKalb County Schools opens

2. click the "FirstClass Client Install" link at the bottom right of the webpage
3. select your computer's operating system
4. follow the instructions provide on the webpage for your operating system

NOTE: Mac OS and Linux require you to select a specific version or distribution

5. the icon for FirstClass will now be on your desktop. Double-click it.
6. click the arrow icon next to Advanced and then click 'Setup...' button,
7. In the space for server, type in fclogin.dekalb.k12.ga.us

Service Setup

Connect via: Local Network.fcp

User ID:

Password:

Login: As guest
 Automatically

Retry login: 0 times

Retry delay: 0 seconds

Fill in if service is accessible via the network

Server: flogin.dekalb.k12.ga.us

Fill in if service is accessible via modem or ISDN

Phone #:

Security settings

Encryption: Default

Server ID:

FirstClass secure authentication only

Refuse upgrades to the FirstClass client software

Notifier Notify me of new mail when offline

Notifier password:

Clears all nonconnection resources from your settings file

8. choose 'save' and then login as usual with your FirstClass login ID and password.
