How do I configure the iPhone/iPad/iOS client?

The [FirstClass Client](#) and [FirstClass Web Access](#) are the only officially supported methods for accessing FirstClass email. The information in this FAQ is provided as a reference only and does not imply that support is provided for devices like the iPhone and iPad that run the iOS.

The FirstClass Mobile Client for iOS has a question mark on the bottom left of the screen that provides additional assistance, an information mark on the bottom right of the screen that provides several client options, and a right arrow in the top right corner that provides access to multiple FirstClass logins.

1. download, install, and launch the [FirstClass Mobile Client from iTunes](#)
2. enter *fclogin.dekalb.k12.ga.us* in the "Server" field
3. enter your FirstClass login ID in the "UserID" field
4. enter your FirstClass password in the "Password" field
5. click the "Login" button

NOTE: You can also [configure your iPhone or iPad to use IMAP](#) to check your FirstClass email.
